

**WEEKLY PROGRESS UPDATE  
FOR OCTOBER 6 – OCTOBER 10, 2003**

**EPA REGION I ADMINISTRATIVE ORDERS SDWA 1-97-1019 and 1-2000-0014**

**MASSACHUSETTS MILITARY RESERVATION  
TRAINING RANGE AND IMPACT AREA**

The following summary of progress is for the period from October 6 through October 10, 2003.

**1. SUMMARY OF ACTIONS TAKEN**

Drilling progress as of October 6 is summarized in Table 1.

Table 1. Drilling progress as of October 6, 2003				
Boring Number	Purpose of Boring/Well	Total Depth (ft bgs)	Saturated Depth (ft bwt)	Completed Well Screens (ft bgs)
EW-275	Demo Area 1 (EW-D1-2)	222	182	
MW-287	Northwest Corner (NWP-6)	250	115	
MW-288	L Range (LP-7)	290	202	
MW-291	L Range (LP-11)	150	56	

bgs = below ground surface  
bwt = below water table

Completed drilling of EW-275 (EW-D1-2) and MW-288 (LP-7), continued drilling of MW-287 (NWP-6), and commenced drilling of MW-291 (LP-11). Well development continued for recently installed wells.

Samples collected during the reporting period are summarized in Table 2. Groundwater profile samples were collected from MW-287, MW-288, and MW-291. Groundwater samples were collected from Bourne water supply and monitoring wells, recently installed wells, and as part of the August round of the Draft 2003 Long-Term Groundwater Monitoring Plan. Soil samples were collected from BIP craters and from grids near the J-3 Range Hillside/Barrage Rocket Sites. Investigation-derived waste (IDW) samples were collected from the Granular Activated Carbon (GAC) treatment system.

**2. SUMMARY OF DATA RECEIVED**

Rush data are summarized in Table 3. These data are for analyses that are performed on a fast turn around time, typically 1-5 days. Perchlorate and explosive analyses for monitoring wells, and perchlorate, explosive and volatile organic compound (VOC) analyses for groundwater profile samples, are conducted in this timeframe, as well as any analyses pursuant to a special request. The rush data are not validated, but are provided as an indication of the most recent preliminary results. Table 3 summarizes only detects, and does not show samples with non-detects.

The status of the explosive detections with respect to confirmation using Photo Diode Array (PDA) spectra is indicated in Table 3. PDA is a procedure that has been implemented for the explosive analysis, to reduce the likelihood of false positive identifications. Where the PDA status is "YES" in Table 3, the detected compound is verified as properly identified. Where the status is "NO", the identification of an explosive has been determined to be a false positive. Where the status is blank, PDA has not yet been used to evaluate the detection, or PDA is not applicable because the analyte is a VOC or perchlorate. Most explosive detections verified by PDA are confirmed to be present upon completion of validation. Table 3 includes the following detections:

Table 3 includes detections from the following areas:

#### Bourne Area

- Groundwater samples from 97-2E had detections of perchlorate. This is the first detection of perchlorate in this well.
- Groundwater samples from 97-5, MW-226M2 and MW-233M3 had detections of perchlorate. The results were similar to previous sampling rounds.

#### Demo Area 1

- Groundwater samples from MW-19S; MW-31M, S and duplicate; MW-73S; MW-76M1 and S; and MW-77M1 and M2 had detections of perchlorate. The results were similar to the previous sampling rounds.

#### Northwest Corner

- Groundwater samples from MW-270M1 and duplicate, and D and duplicate had detections of perchlorate. The results were similar to the previous sampling round.
- Groundwater samples from MW-270S had a detection of RDX and perchlorate. The detection of perchlorate was similar to the results from the previous sampling round. The detection of RDX was confirmed by PDA spectra. This is the first detection of RDX in this well. RDX was not detected in the profile samples collected from the same interval.

#### Southeast Ranges

- Profile results from MW-288 (LP-7) had detections of perchlorate and explosives. Of the explosive compounds, only RDX was confirmed by PDA spectra in four intervals between 92 and 122 feet below the water table. Perchlorate was detected in four intervals between 92 and 122 feet below the water table. A well screen was set at the depth (102 to 112 ft bwt) corresponding to the midpoint of the perchlorate and RDX detections.

### **DELIVERABLES SUBMITTED**

Monthly Progress Report for September 2003	10/09/2003
Draft Central Impact Area Rapid Response Action Work Plan	10/10/2003
Weekly Progress Update for September 29 – October 3, 2003	10/10/2003

### **3. SCHEDULED ACTIONS**

Scheduled actions for the week of October 13 include complete drilling at MW-287 (NWP-6), complete well installation at MW-288 (LP-7), continue drilling at MW-291 (LP-11), and commence drilling at CBP-7. Groundwater sampling at Bourne water supply and monitoring wells, recently installed wells, and as part of the August round of the Draft 2003 Long-Term Groundwater Monitoring Plan will continue. Soil samples will be collected from BIP craters. Geophysical anomaly excavation and removal in the Demo Area 1 will also continue.

### **4. SUMMARY OF ACTIVITIES FOR DEMO AREA 1**

Drilling of the Pew Road extraction well (EW-275) was completed on 10/06/2003. EPA comments on the Draft Groundwater Report Addendum for the Demo Area 1 Groundwater Operable Unit (OU) were received on 10/09/2003. DEP comments are expected shortly. Modeling activities in support of the Feasibility Study (FS) are currently underway. Responses to agency comments on the Groundwater RRA Plan are being prepared.

Geophysical anomaly excavation and removal within the Demo Area 1 depression continues. Responses to EPA comments on the Soil Treatment Plan and Treatability Study are being prepared. DEP comments are expected shortly.
