

**MONTHLY PROGRESS REPORT #301  
FOR APRIL 2022**

**EPA REGION I ADMINISTRATIVE ORDERS SDWA 1-97-1019 and 1-2000-0014**

**JOINT BASE CAPE COD (JBCC)  
TRAINING RANGE AND IMPACT AREA**

The following summary of progress is for the period from 1 to 30 April 2022.

**1. SUMMARY OF REMEDIATION ACTIONS**

**Remediation Actions (RA) Underway at Camp Edwards as of 29 April 2022:**

**Demolition Area 1 Comprehensive Groundwater RA**

The Demolition Area 1 Comprehensive Groundwater RA consists of the removal and treatment of contaminated groundwater to control further migration of explosives compounds and perchlorate. Extraction, treatment, and recharge (ETR) systems at Frank Perkins Road, Base Boundary, and the Leading Edge include extraction wells, an ex-situ treatment process to remove explosives compounds and perchlorate from the groundwater, and injection wells to return treated water to the aquifer.

The Frank Perkins Road Treatment Facility has been optimized as part of the Environmental and System Performance Monitoring (ESPM) program at Demolition Area 1. The treatment facility continues to operate at a flow rate of 175 gallons per minute (gpm), with over 2.911 billion gallons of water treated and re-injected as of 29 April 2022. The following Frank Perkins Road Treatment Facility shutdowns occurred in April.

- On 11 April 2022 by the JBCC Fire Department to test battery backup performance of the fire alarm system over a 48-hour period and was restarted on 13 April 2022.
- 1045 on 28 April 2022 due to a power outage and was restarted at 1310 on 28 April 2022.

The Base Boundary MTU continues to operate at a flow rate of 65 gpm. As of 29 April 2022, over 330.5 million gallons of water were treated and re-injected. The following Base Boundary MTU shutdowns occurred in April.

- 0900 on 26 April 2022 to move an electrical disconnect to make space for a VFD cabinet and was restarted at 1038 on 26 April 2022.

The Leading Edge system continues to operate at a flow rate of 100 gpm. As of 29 April 2022, over 298.3 million gallons of water were treated and re-injected. The following Leading Edge system shutdowns occurred in April.

- 0239 on 27 April 2022 due to a power interruption and was restarted at 0758 on 27 April 2022.

The Pew Road Mobile Treatment Unit (MTU) was turned off on 08 March 2021 (formerly operated at a flow rate of 65 GPM). Over 672.9 million gallons of water were treated and re-injected during the RA.

**J-2 Range Groundwater RA**

Northern Plant

The J-2 Range Northern Treatment facility consists of removal and treatment of contaminated groundwater to control further migration of explosives compounds and perchlorate. The Extraction, Treatment, and Re-infiltration system includes three extraction wells, an ex-situ treatment process to remove explosives compounds and perchlorate from the groundwater, and an infiltration basin to return treated water to the aquifer.

The Northern MTUs E and F continue to operate at a flow rate of 250 gpm. As of 29 April 2022, over 1.947 billion gallons of water have been treated and re-injected. No MTU E and F shutdowns occurred in April.

The Northern Treatment Building G continues to operate at a flow rate of 225 gpm. As of 29 April 2022, over 1.473 billion gallons of water have been treated and re-injected. No Northern MTU G shutdowns occurred in April.

#### Eastern Plant

The J-2 Range Eastern Treatment facility consists of removal and treatment of groundwater to minimize downgradient migration of explosives compounds and perchlorate. The ETI system includes the following components: three extraction wells in an axial array, an ex-situ treatment process consisting of an ion exchange (IX) resin and granular activated carbon (GAC) media to treat perchlorate and explosives compounds, and three infiltration trenches located along the lateral boundaries of the plume where treated water enters the vadose zone and infiltrates into the aquifer. The J-2 Range Eastern system is running at a combined total flow rate of 495 gpm.

The MTUs H and I continue to operate at a flow rate of 250 gpm. As of 29 April 2022, over 1.587 billion gallons of water have been treated and re-injected. No MTU H and I shutdowns occurred in April.

MTU J continues to operate at a flow rate of 120 gpm. As of 29 April 2022, over 740.0 million gallons of water have been treated and re-injected. The following MTU J shutdowns occurred in April.

- 1835 on 09 April 2022 due to a VFD fault alarm and was restarted at 0820 on 12 April 2022.

MTU K continues to operate at a flow rate of 125 gpm. As of 29 April 2022, over 862.0 million gallons of water have been treated and re-injected. No MTU K shutdowns occurred in April.

#### J-3 Range Groundwater RA

The J-3 Range Groundwater RA consists of removal and treatment of contaminated groundwater to control further migration of explosives compounds and perchlorate. The ETR system includes four extraction wells, an ex-situ treatment process to remove explosives compounds and perchlorate from the groundwater and utilizes the existing Fuel Spill-12 (FS-12) infiltration gallery to return treated water to the aquifer.

The J-3 system is currently operating at 195 gpm while EW-IP2 is inactive during maintenance. As of 29 April 2022, over 1.599 billion gallons of water have been treated and re-injected. The following J-3 Range system shutdowns occurred in April.

- 1130 on 17 April 2022 due to a possible power interruption and was restarted at 0746 on 18 April 2022.

- 0545 on 19 April 2022 due to a power interruption and was restarted at 0900 on 19 April 2022.
- 1600 on 19 April 2022 due to a low flow alarm and was restarted at 0740 on 20 April 2022.
- 1124 on 20 April 2022 due to a low flow alarm and was restarted at 1249 on 20 April 2022.
- 1710 on 21 April 2022 due to a low flow alarm and was restarted at 1020 on 22 April 2022.
- 1752 on 22 April 2022 due to a low flow alarm and was restarted at 0759 on 25 April 2022.
- 1300 on 25 April 2022 to test for faults, which determined that the pump and motor must be replaced; both were on order as of 06 May 2022.

#### J-1 Range Groundwater RA

##### Southern Plant

The J-1 Range Southern Groundwater RA consists of removal and treatment of contaminated groundwater to control further migration of explosives compounds. The ETR system includes two extraction wells, an ex-situ treatment process to remove explosives compounds from the groundwater, and an infiltration trench to return treated water to the aquifer.

The Southern MTU continues to operate at a flow rate of 125 gpm. As of 29 April 2022, over 718.0 million gallons of water have been treated and re-injected. The following J-1 Range Southern system shutdowns occurred in April.

- 0545 on 19 April 2022 due to a power interruption and was restarted at 0740 on 19 April 2022.

##### Northern Plant

The J-1 Range Northern Groundwater RA consists of removal and treatment of contaminated groundwater to control further migration of explosives compounds and perchlorate. The ETR system includes two extraction wells, an ex-situ treatment process to remove explosives compounds and perchlorate from the groundwater, and an infiltration trench to return treated water to the aquifer.

The Northern MTU continues to operate at a total system flow rate of 250 gpm. As of 29 April 2022, over 1.087 billion gallons of water have been treated and re-injected. No J-1 Range Northern MTU shutdowns occurred in April.

#### Central Impact Area RA

The Central Impact Area (CIA) Groundwater treatment facility consists of removal and treatment of groundwater to minimize downgradient migration of explosives compounds and perchlorate. The ETR system includes the following components: three extraction wells, an ex-situ treatment process consisting of an ion exchange resin and granular activated carbon media to treat explosives compounds, and three infiltration galleries to return treated water to the aquifer. The CIA systems 1, 2, and 3 continue to run at a combined total flow rate of 750 gpm. As of 29 April 2022, over 2.820 billion gallons of water have been treated and re-injected. The following CIA system shutdowns occurred in April.

- 0850 on 23 March 2022 to diagnose the reinjection well failure, to repair the well screen, and to reinstall vessel carbon and was restarted at 0755 on 5 April 2022.
- 0500 on 08 April 2022 to repair an antenna conduit failure which allowed water ingress, to replace a power supply, and to reprogram the programmable logic computer (PLC) and was restarted at 1340 on 08 April 2022.
- 0840 on 22 April 2022 to replace the uninterrupted power supply and was restarted at 0900 on 22 April 2022.
- 1045 on 28 April 2022 due to a power outage and was restarted at 1340 on 28 April 2022.
- 1045 on 28 April 2022 due to a power outage and was restarted at 1330 on 28 April 2022.

## 2. SUMMARY OF ACTIONS TAKEN

### Operable Unit (OU) Activity as of 29 April 2022:

#### CIA

- Groundwater sampling within CIA SPM
- Hydraulic monitoring within CIA SPM
- Intrusive investigations
- Surface and vegetation clearance
- Routine processing of MD
- Routine check of CSS cover
- Demolition operations
- Staking of grids

#### Demolition Area 1

- Installation of new fire panel, pull stations, and strobes followed system test by JBCC Fire Department

#### Demolition Area 2

- No activity

#### J-1 Range

- Groundwater sampling within J-1 South SPM

#### J-2 Range

- Hydraulic monitoring within J-2 East SPM
- Bag filters exchanged.

#### J-3 Range

- Groundwater sampling within J-3 SPM

#### L Range

- No activity

#### Small Arms Ranges

- No activity

Northwest Corner

- No activity

Training Areas

- Inspected staged soil at H Range

Impact Area Roads

- No activity

Other

- Collected process water samples from Central Impact Area, Demolition Area 1, J-1 Range Northern, J-1 Range Southern, J-2 Range Eastern, J-2 Range Northern, and J-3 Range treatment systems

**JBCC Impact Area Groundwater Study Program (IAGWSP) Tech Update Meeting Minutes for 14 April 2022**Project and Fieldwork Update

Discussion was held on observations made by EPA during consolidated shot operations. During a field visit, EPA had questions on the set up, the plastic being used, and the soil outside of the BEM structure. It was noted that the sandbags and plywood were being used as a safety measure but that this wasn't in the written SOP. It was noted that it is standard and will be added to the SOP. The plastic seen during observations was originally beneath the clean soil stockpile before it was placed on the structure. EPA noted that there appeared to be much more sand outside of the structure compared to when it was originally constructed. It was agreed that it needs to be cleaned up and moved to the stockpile.

Weston has four teams in the CIA conducting intrusive in SU3-2 and SU4; those are carryovers from Phase IV Area 1. Weston is also staking the next five acres of grids and doing surface clearance ahead of vegetation clearance. Weston is working in the northernmost area around the SCAR Rocket area.

The LTM crews are currently performing the annual LTM sampling in the CIA which will be ongoing through April. They will move to the J-1 South, then J-3 PFAS then Demolition Area 2. The LTM crews will need to go back to CIA to collect samples from a few wells in the CIA proper that they were unable to collect to while Weston was away. All the treatment systems are currently up and running at normal flow rates. Monthly process water sampling were collected 1 April through 7 April. CIA 2 was shut down on 23 March due to a failing reinjection well. Video inspection showed that the screen was partially filled with material. Further inspection determined the material was carbon, which was evacuated from the well, and the well was redeveloped. On 4 April, the carbon was removed from the lag vessel, which was determined to be the source. The effluent screen was inspected and was determined to be partially broken. The screen was repaired, and the vessel was refilled with carbon. It shut down again on 8 April because water was entering the control panel from a broken conduit outside. The electric and control panels were reprogrammed, and the effluent screen went back online the same day. J-2 East Unit J plant tripped and was shut down on 9 April. It was determined to be blown fuses on two separate power poles. Review of camera footage determined that a crow landed on one of

the transformers, which resulted in damage to the starter motor and VFD panel. They were replaced, and the system was brought back online on 12 April.

The disposal of the 50 cubic yards of soil currently staged at H Range is still pending. All paperwork is in place. Huntsville is in the process of updating the ESS.

#### Action Items

The action items were discussed and updated.

### **JBCC Impact Area Groundwater Study Program (IAGWSP) Tech Update Meeting Minutes for 28 April 2022**

#### Project and Fieldwork Update

The new permanent Ordnance and Explosives Safety Specialist (OEES) from Huntsville arrived this week. It is Stormy Baird, who has worked at JBCC in the past and is very familiar with the project. In the CIA, Weston has completed clearing the items from in the CDC bunker. They are preparing for BIPS, with approximately thirty to complete. The BIP notifications will be sent shortly. USACE is waiting for a memo from Weston outlining their request to demolish all the white phosphorus (WP) rounds in a grid. Weston met with the JBCC Fire Department and consulted with Huntsville. The parties concurred that moving the consolidated shot for all WP into a grid is safer than doing it in the CSS structure. USACE asked Weston to share information with the team regarding doing the WP BIPs in the field. Weston has intrusive teams in SU3-2 and SU4, which are carryovers from last years' fifteen acres. The Weston teams are performing vegetation clearance in the new ten acres. It was noted that photographs and videos of recent consolidated shot activities have been loaded into EDMS. IAGWSP and USACE are working to find a permanent location in the database to catalogue all past media.

The groundwater sampling crews are currently finishing up the CIA system performance monitoring wells and sampling the J-3 treatment plant influent and effluent monitoring wells for PFAS. Those activities should be finished this week after which the crews will move to J-1 South, followed by J-2 North and Demolition Area 2. Sampling crews completed both the CIA and J-2 Range hydraulic events this week. All treatment systems are currently up and running at normal flow rates except for the J-3 system. Beginning on 17 April, the plant was tripping due to power interruptions, attributed to extraction well J3EWIP2. It was determined that the pump and motor of that extraction well need to be replaced. They are currently being ordered as of 28 April 2022. The J-3 system is running at a reduced capacity of 195 gallons per minute.

The disposal of the 50 cubic yards of soil currently staged at H Range is still pending. The group was reminded that the soil is from the Former E Range, J-2 Range, and KD Range. Huntsville is in the process of reviewing the updated ESS. Once everyone has signed off on the ESS, disposal will be scheduled.

Discussion was held on EPA comments on the Draft Technical Memorandum for J-2 Range Northern PFAS Evaluation. IAGWSP thought it would be good to get clarification on some of the comments and discuss the path forward. The cover letter from EPA requested greater detail on where PFAS are detected including screen depth and where the detections might be coming from. The cover letter also noted that the current technical memorandum failed to account for additional potential sources near other portions of the range e.g., J-2 East. IAGWSP noted that

the IAGWSP goal was to keep this effort focused on the immediate risk to the water supply well and as such would like to document any J-2 East investigation in a separate technical memorandum. EPA noted that they did not have an objection to that but wanted the efforts performed concurrently.

#### Action Items

The action items were discussed and updated.

#### **JBCC Cleanup Team Meeting**

The next JBCC Cleanup Team (JBCCCT) has yet to be scheduled (previous meeting was 13 April 2022). Meeting details and presentation materials from previous meetings can be found on the IAGWSP web site at <http://bcc-iagwsp.org/community/impact/presentations/>. The Cleanup Team meeting discusses late breaking news and responses to action items, as well as updates from the IAGWSP and the Installation Restoration Program (IRP). The JBCCCT meetings provide a forum for community input regarding issues related to both the IRP and the IAGWSP.

### **3. SUMMARY OF DATA RECEIVED**

Table 1 summarizes sampling for all media from 1 to 30 April 2022. Table 2 summarizes the validated detections of explosives compounds and perchlorate for all groundwater results received from 1 to 30 April 2022. These results are compared to the Maximum Contaminant Levels/Health Advisory (MCL/HA) values for respective analytes. Explosives and perchlorate are the primary contaminants of concern (COC) at Camp Edwards. Table 3 summarizes sampling of influent and groundwater samples for per- and polyfluoroalkyl substances (PFAS) from 1 June 2019 to present.

The operable units (OUs) under investigation and cleanup at Camp Edwards are the Central Impact Area, Demolition Area 1, Demolition Area 2, J-1 Range, J-2 Range, J-3 Range, L Range, Northwest Corner, Small Arms Ranges, and Training Areas. Environmental monitoring reports for each OU are generated each year to evaluate the current year groundwater results. These reports are available on the site Environmental Data Management System (EDMS) and at the project document repositories (IAGWSP office and Jonathan Bourne Library).

#### 4. SUBMITTED DELIVERABLES

Deliverables submitted during the reporting period include the following:

- |  |               |
|--|---------------|
| • Monthly Progress Report No. 300 for March 2022   | 10 April 2022 |
| • J-3 Range Draft Technical Memorandum: Confirmatory PFAS Sampling   | 08 April 2022 |
| • Response to Comments on the Draft Technical Memorandum: Central Impact Area RDX Plume Shell Development                            | 12 April 2022 |
| • Response to Comments on the Central Impact Area Draft 2021 Environmental Monitoring Report   | 14 April 2022 |
| • J-2 Range Northern Draft Technical Memorandum: PFAS Evaluation   | 14 April 2022 |
| • J-1 Range Southern Draft Technical Memorandum: Additional Monitoring Well  | 14 April 2022 |
| • J-2 Range Northern Draft Technical Memorandum: Perchlorate Plume Shell   | 18 April 2022 |
| • J-2 Range Eastern Perchlorate and RDX Plume Shell Development Draft Technical Memorandum   | 18 April 2022 |
| • Central Impact Area 2021 Final Environmental Monitoring Report   | 25 April 2022 |
| • Response to Comments Letter on the Small Arms Ranges Revised Draft Completion of Work Report                                       | 27 April 2022 |
| • Draft Final Small Arms Ranges Soil Removal Activities Completion of Work Report  | 27 April 2022 |
| • Response to Comments on the Draft Technical Memorandum: Demolition Area 1 Groundwater Extraction System Well Field Design – MW-533 | 28 April 2022 |

#### 5. SCHEDULED ACTIONS

The following actions and/or documents are being prepared in May 2022.

- J-2 Range, Phase-2, Addendum to Post-DD Confirmation Geophysical and Soil Investigation Findings Revised Technical Memorandum and Response to Comments
- Central Impact Area Final 2021 Annual Environmental Monitoring Report
- Five Year Review Report
- IRA Completion Report
- J-1 Southern Final 2021 Annual Environmental Monitoring Report
- Response to Comments on the J-2 Northern Draft 2022 Annual Environmental Monitoring Report
- J-2 Northern Revised Draft Work Plan for PFAS Sampling and Proposed New Monitoring Wells
- J-2 Northern Plume Shell Development Technical Memorandum
- KD Range Confirmatory Geophysical and Soil Investigation Completion of Work Report

- Former E Range Confirmatory Geophysical and Soil Investigation Findings Phase 2 Draft Technical Memorandum
- J-3 Range Revised Draft Work Plan for PFAS Sampling
- Response to Comments Letter on the Central Impact Area Draft Source Area Removal Report
- Central Impact Area Final Technical Memorandum: Plume Shell Update
- Demolition Area 1 Final Technical Memorandum: Proposed New Extraction Well
- Response to Comments Letter on the J-1 Southern Draft Proposed New Well Technical Memorandum
- Response to Comments Letter on the J-2 Eastern Draft 2021 Annual Environmental Monitoring Report
- Response to Comments Letter on the J-3 Draft 2021 Annual Environmental Monitoring Report
- Response to Comments Letter on the Northwest Corner Demonstration of Compliance Report

**TABLE 1**

## PFAS Summary Report – Groundwater Joint Base Cape Cod, IAGWSP

### Notes:

na/L = nanograms per liter; ua/ka = micrograms per kilogram; U = not detected; J = estimated; UJ = estimated non detect

Non detects are calculated as zero in the summations.

**Bolded results indicate detections of PFAS**

**Bolded and highlighted results indicate detection of PFAS above the EPA Lifetime Health Advisory: PFOS + PFOA > 70 ng/L.**

**Bolded and highlighted results indicate detection of PFAS6 above the MassDEP MCL: PFOS + PFOA + PFDA + PFHpA + PFHxS + PFNA > 20 ng/L**

† Lifetime Health Advisory, US Environmental Protection Agency, May 2016

The PFOS and PFOA summation includes all detections at and above the DL.

‡ PFAS Maximum Contaminant Level (MCL) Final Amendments ("MCL", 310 CMR 22.00 PFAS MCL Amendments), Massachusetts Department of Environmental Protection, October 2, 2020

The MassDEP PFAS summation includes all quantifiable results reported at and above the LOQ.

§ Sum of All Compounds Detected includes all detections at and above the DL.
