NOTES:

Sort Type
SC - Composite Sample
SD - Discrete Sample
BIP - Blow in Place
BLP - Burial Pit
BNP - Burn Pit
SB- Soil Boring
EXP - Explosives
Herb - Herbicides
PCBs - Polychlorinated Biphenyls
ft - feet
bgs - below ground surface

Analytical Method
Pest - Pesticides
VOC - Volatile Organic Compounds
SVOCs - Semi-Volatile Organic Compounds
TOC - Total Organic Carbon
PCN - Polychlorinated Naphthalenes
Perc- Perchlorate

Plan
JLWP- Final J-1, J-3 and L Ranges Work Plan
ADWP1- Additional Delineation Work Plan No. 1
ADWP2- Additional Delineation Work Plan No. 2
RR - Rapid Response
RRAWP - RRA Work Plan
MSP - Munitions Survey Program

NOTES:

Sort Type
MIS - Multi Increment Sample
SD - Discrete Sample
BIP - Blow in Place
ft - feet
bgs - below ground surface

Analytical Method
VOC - Volatile Organic Compounds
SVOCs - Semi-Volatile Organic Compounds
Perc- Perchlorate
EXP - Explosives
PCNs - Polychlorinated Naphthalenes

Shading indicates that the screening level was exceeded by the maximum detected concentration.

NA = Not Available.

Notes:

Data set consists of all sampling events for the monitoring wells presented in Appendix D-1 and D-2 for the J-2 Range Eastern and Northern plumes, respectively.

The following 109 monitoring wells are within the J-2 Eastern plume: 84MW0005, 90WT0009, J2MW-01M1, J2MW-01M2, J2MW-04M1, J2MW-04M2, J2MW-05M1, J2MW-05M2, MW-116S, MW-120M1, MW-120S, MW-121S, MW-122S, MW-137S, MW-154M1, MW-154S, MW-158M1, MW-158M2, MW-158S, MW-170M1, MW-170M2, MW-170M3, MW-18D, MW-18M1, MW-18M2, MW-18S, MW-215M1, MW-215M2, MW-215S, MW-228M1, MW-228M2, MW-228S, MW-254M1, MW-254M2, MW-307M1, MW-307M2, MW-307M3, MW-310M1, MW-319M1, MW-319M2, MW-319S, MW-321M1, MW-321M2, MW-324M1, MW-324M2, MW-334M1, MW-334M2, MW-335M1, MW-335M2, MW-335M3, MW-336D, MW-336M1, MW-339M1, MW-339M2, MW-342M1, MW-342M2, MW-342S, MW-351M1, MW-351M2, MW-354M1, MW-354M2, MW-355M1, MW-355S, MW-357M1, MW-357M2, MW-358M1, MW-358M2, MW-362M1, MW-362M2, MW-365M1, MW-365M2, MW-365S, MW-366M1, MW-366M2, MW-366M3, MW-367M1, MW-367M2, MW-368M1, MW-368M2, MW-368M3, MW-372D, MW-372M1, MW-381M1, MW-381M2, MW-388M1, MW-388M2, MW-388M3, MW-393D, MW-393M1, MW-393M2, MW-399M1, MW-399M2, MW-436M1, MW-436M2, MW-48D, MW-48M1, MW-48M2, MW-48M3, MW-48S, MW-49D, MW-49M1, MW-49M2, MW-49M3, MW-49S, MW-57D, MW-57M1, MW-57M2, MW-57M3 and MW-57S.

The following 76 monitoring wells are within the J-2 Northern plume: J2EW1-MW1-A, J2EW1-MW1-B, J2EW1-MW1-C, J2EW2-MW1-A, J2EW2-MW2-A, J2EW2-MW2-B, J2EW2-MW2-C, J2EW2-MW3-A, J2EW2-MW3-B, J2EW2-MW3-C, J2EW3-MW-2-A, J2EW3-MW-2-B, J2EW3-MW-2-C, MW-117S, MW-119S, MW-12, MW-130D, MW-130M1, MW-130S, MW-229M1, MW-229M2, MW-229M3, MW-229M4, MW-230M1, MW-230M2, MW-234M1, MW-234M2, MW-263M1, MW-263M2, MW-289M1, MW-289M2, MW-289S, MW-29, MW-292M1, MW-292M2, MW-293M1, MW-293M2, MW-293S, MW-296M1, MW-296M2, MW-300M1, MW-300M2, MW-300M3, MW-302M1, MW-302M2, MW-305M1, MW-313M1, MW-313M2, MW-313M3, MW-318M1, MW-318M2, MW-318S, MW-322M1, MW-322S, MW-327M1, MW-327M2, MW-327M3, MW-330M1, MW-330M2, MW-330M3, MW-331M1, MW-331M2, MW-337D, MW-337M1, MW-340D, MW-340M1, MW-340M2, MW-345M1, MW-345M2, MW-348M1, MW-348M2, MW-63D, MW-63M1, MW-63M2, MW-63M3, and MW-63S.

Laboratory data validation qualifier codes used for the "Maximum Concentration" are as follows:
J = Detected Concentration
NJ = Estimated Concentration
"-" = No listed value.
* = Value is also the Massachusetts Maximum Contaminant Level
(a) Federal Maximum Contaminant Level
(b) HA is the Federal EPA Lifetime Health Advisory value (Spring, 2012) (http://water.epa.gov/action/advisories/drinking/upload/dwstandards2012.pdf).
The HA shown is the Lifetime value. If no Lifetime value was available, the lower of the Drinking Water Equivalent Level (DWEL) or the $1x10^{-6}$ Cancer Risk level. If neither of these values was available, then the 10-Day acute concentration is
(c) The USEPA Regional Screening Level (RSL), May, 2012. (http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/index.htm)
(d) MCP Method 1 GW-1 Standards, May 2009 (http://www.mass.gov/dep/service/compliance/riskasmt.htm)
(e) Federal MCL for perchlorate is 15 ug/L. The MCP GW-1 Standard for perchlorate is also the Massachusetts MCL.
(f) Chromium VI used as a surrogate for the RSL value for Chromium, Total.
(g) The Tapwater RSL for mercuric chloride (and other mercury salts) is used for mercury.
(h) The MCL for nitrate is 10,000 ug/L. The Tapwater RSL for nitrate is 25,000 ug/L. Values shown are for nitrite which was conservatively chosen for screening purposes. The HA shown is the 10-day HA for nitrate + nitrite. (http://www.epa.gov/ogwdw000/pdfs/factsheets/ioc/tech/nitrates.pdf)
(i) The Tapwater RSL value presented was not published in the EPA RSL Table, but was calculated using that approach and assumed exposure parameters along with the CHPPM oral RfD toxicity value. The MCP GW-1 value shown for tungsten is an Interim Drinking Water Guideline from MassDEP/ORS (MassDEP, 2006).
(j) The Tapwater RSL for metallic vanadium and compounds is 2.6 ug/L. Value shown is for vanadium and compounds.
(k) MCPA used as a surrogate for the HA value for MCPP.
(l) The Tapwater RSL for Endrin is used for Endrin Aldhyde.
(m) The MCL for total trihalomethanes is used for chloroform.

TABLE 6-2
Comparison of Maximum Concentrations in Soil to Screening Levels
J-2 Range - Area 1

Analyte	Frequency of Detection	FOD	Maximum Detected Concentration (mg/kg)	Location of Maximum Concentration	Detected in J-2 East Groundwater	MCP S-1/GW-1 Standard (3) (mg/kg)	MassDEP Leaching Based Soil Concentration (mg/kg)	MMR SSL (mg/kg)	EPA Risk-Based SSL (mg/kg)	Background Value (2) (mg/kg)

Nitrogen, Ammonia (as N)	85 / 90	94%	860	SS101Q	Yes	NA	NA	NA	NA	NA
Nitrogen, Nitrate-Nitrite	73 / 90	81%	3260	SS101Q	Yes	NA	NA	NA	NA	0.5
Phosphorus, Total PO4 (as PO4)	90 / 90	100%	15600	SS101Q	Yes	NA	NA	NA	NA	291

(1) Non-detects were included at one-half the detection limit.
(2) Site-specific background level for outwash (AMEC 2001).
(3) Maximum value allowable for human contact

Shading indicates that the screening level was exceeded by the maximum detected concentration.
NA = Not Available.

mg/Kg = milligram per Kilogram

(1) Non-detects were included at one-half the detection limit.
(2) Site-specific background level for outwash (AMEC 2001).
(3) Maximum value allowable for human contact

Shading indicates that the screening level was exceeded by the maximum detected concentration.
NA = Not Available.

TABLE 9-1
J-2 Range Remedial Investigation/Feasibility Study
Summary of Regulatory Considerations*

AUTHORITY/TYPE	PROVISION	SYNOPSIS
Federal/Chemical Specific	SDWA MCLs, 40 CFR 141.61 – 141.63	The EPA has promulgated SDWA MCLs (40 CFR 141-143) that are enforceable standards for public drinking water supplies. The standards protect drinking water quality by limiting the levels of specific contaminants that can adversely affect public health.
State/Chemical Specific	MA Drinking Water Regulations, 310 CMR 22.00	These standards establish Massachusetts MCLs (MMCLs) for public drinking water systems (310 CMR 22.00 et seq.).
Federal/Action Specific	SDWA 47 FR 30282 Sole Source Aquifer	Pursuant to Section 1424(e) of the Safe Drinking Water Act, the EPA has determined that the Cape Cod aquifer is the sole or principal source of drinking water for Cape Cod, Massachusetts, and that the Cape Cod aquifer, if contaminated, would create a significant hazard to public health.
Federal/Chemical Specific	Drinking Water Health Advisories, published at http://www.epa.gov/waterscience/criteria/drinking/	These are exposure concentrations protective of adverse non-cancer effects for a given exposure period. The 1-day and 10-day HA are designed to protect a child; the lifetime HA is designed to protect an adult.
Federal/Chemical Specific	Drinking Water Equivalent Levels (DWELs), published at http://www.epa.gov/waterscience/criteria/drinking/	DWELs set forth lifetime exposure concentration values protective of adverse, non-cancer health effects, assuming that all of the exposure to a contaminant is from drinking water.
Federal/Chemical Specific	Human Health Reference Doses (RfDs), Reference Concentrations (RfCs), Cancer Slope Factors (CSFs), and 10^{-6} excess lifetime cancer risk level	These risk-based concentrations are considered together with site-specific exposure information to develop concentrations of residual contamination that will not endanger human health.
State/Chemical Specific	Massachusetts Contingency Plan, Method 1, GW-1 Groundwater Standards, 310 CMR 40.0974(2) Table 1	These cleanup standards were developed by MassDEP considering a defined set of exposures considered to be a conservative estimate of the potential exposures at most sites. Groundwater at MMR is classified as GW-1.
State/Chemical Specific	Massachusetts Drinking Water Guidelines, in Standards and Guidelines for Chemicals in Massachusetts Drinking Waters (Spring 2009), available at http://www.mass.gov/dep/water/dwstand.pdf.	This document lists both promulgated Massachusetts MCLs and also MassDEP Office of Research and Standards guidelines for chemicals that do not have Massachusetts MCLs. Standards promulgated by EPA but not yet effective may be included on the Guidelines list. These values are derived based on a review and evaluation of all available data for the chemical of interest.
State/Action Specific	Massachusetts Surface Water Quality Standards, 314 CMR 4.00	These MassDEP standards prescribe the minimum water quality criteria required to sustain the designated uses of Massachusetts waters. The levels are designed to prevent all adverse health effects from ingestion, inhalation or dermal contact.

TABLE 9-1
J-2 Range Remedial Investigation/Feasibility Study
Summary of Regulatory Considerations*

AUTHORITY/TYPE	PROVISION	SYNOPSIS
Federal/Action Specific	Subtitle C Standards for Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities, 40 CFR Part 264	These requirements establish minimum national standards that define the acceptable management of hazardous waste.
State/Action Specific	MA Hazardous Waste Management Regulations (310 CMR 30.0000)	These requirements specify how a generator of solid waste must determine whether that waste is hazardous. If waste is determined to be hazardous, it must be managed in accordance with these requirements.
Federal/Action Specific	EPA Guidance on "Use of Monitored Natural Attenuation at Superfund, RCRA Corrective Action, and Underground Storage Tank Sites" (9200.4-17P) (Apr. 21, 1999)	This guidance describes EPA's policy regarding the use of monitored natural attenuation (MNA) for the cleanup of contaminated soil and groundwater. It provides guidance regarding necessary site-specific characterization data and analysis, a methodology for determining a reasonable timeframe for remediation, a preference for remediation of sources, appropriate performance monitoring and evaluation, and a preference for contingency remedies.
Federal/Action Specific	Resource Conservation and Recovery Act (RCRA) [40 CFR 261-262]	These regulations govern the identification and listing of hazardous waste under RCRA, and the requirements on generators of hazardous waste.
Federal/Action Specific	RCRA Land Disposal Restrictions [40 CFR 268]	These regulations restrict the disposal of any treatment wastes classified as hazardous waste.
State/Action Specific	Solid Waste Management Regulations (RCRA Subtitle D), 310 CMR 19.000 et seq.	If a waste is determined to be a solid waste, it must be managed in accordance with the state regulations at 310 CMR 19.000 et seq.
Federal/Action Specific	Hazardous Waste Operations and Emergency Response, 29 CFR 1910.120	These regulations describe training, monitoring, planning, and other activities to protect the health of workers performing hazardous waste operations.
Federal/Action Specific	Underground Injection Control Program [40 CFR 114, 144, 146, 147, 148, 1000]	Underground Injection Control Program regulations outline minimum program and performance standards for underground injection wells and prohibit any injection that may cause a violation of any primary drinking water regulation in the aquifer. Infiltration galleries and wells fall within the broad definition of Class V wells. These regulations are administered by the State.
State/Action Specific	MassDEP Stormwater Management Program Policy (Nov. 18, 1996)	Provides policies and guidance on complying with the state's stormwater discharge requirements.
Federal/Action Specific	National Environmental Policy Act, 42 U.S.C. 4321-4370f	"EPA believes that NGB is not required to follow NEPA procedures, as long as the NGB's actions are conducted in accordance with the administrative order, because of the provision in the CEQ regulations exempting enforcement actions from NEPA." (USEPA, 1 March 01)

TABLE 9-1
J-2 Range Remedial Investigation/Feasibility Study
Summary of Regulatory Considerations*

AUTHORITY/TYPE	PROVISION	SYNOPSIS
Federal/Action Specific	CWA NDPES Stormwater Discharge Requirements, 40 CFR 122.26	Establishes requirements for stormwater discharges associated with construction activities that result in a land disturbance of equal to or greater than one acre of land. The requirements include good construction management techniques; phasing of construction projects; minimal clearing; and sediment, erosion, structural, and vegetative controls to mitigate stormwater run-on and runoff.
State/Action Specific	Stormwater Discharge Requirements, 314 CMR 3.04 and 314 CMR 3.19	Requires that stormwater discharges associated with construction activities be managed in accordance with the general permit conditions of 314 CMR 3.19 so as not to cause a violation of Massachusetts surface water quality standards in the receiving surface water body (including wetlands).
State/Chemical Specific	Massachusetts Air Pollution Control Regulations [310 CMR 6.00 – 7.00]	Construction activities could trigger Massachusetts Air Pollution Control Regulations (310 CMR 6.00 – 7.00). These regulations set emission limits necessary to attain ambient air quality standards for fugitive emissions, dust and particulates.
State/Action Specific, Chemical Specific	310 CMR 40.0040 Construction and operation of a groundwater treatment plant	Regulations establish management procedures for remedial wastewater as well as the construction, installation, change, operation and maintenance of treatment works for Remedial Wastewater. Treatment works shall be inspected and the inspections documented. Treatment works shall be protected from vandalism and measures shall be taken to prevent system failure, contaminant pass through, interference, by-pass, upset, and other events likely to result in a discharge of oil and/or hazardous material to the environment.
State/Action Specific, Chemical Specific	Discharge of Groundwater 310 CMR 40.0045	Regulations restrict remedial wastewater discharge to the ground surface or subsurface and/or groundwater. Such a discharge should not erode or impair the functioning of the surficial and subsurface soils, infiltrate underground utilities, building interiors or subsurface structures, result in groundwater mounding within two feet of the ground surface, or result in flooding or breakout to the ground surface. The concentrations of all pollutants discharged must be below the Massachusetts Groundwater Quality Standards established by 314 CMR 5.10(3). The concentrations must also be below the applicable Reportable Concentrations established by 310 CMR 40.0300 and 40.1600.
State/Action Specific	Discharge of Groundwater 310 CMR 40.0300 and 310 CMR 40.1600	The MCP contains special provisions for the discharge of groundwater containing very low levels of oil or hazardous material. Groundwater containing oil and/or hazardous material in concentrations less than the applicable release notification threshold established by 310 CMR 40.0300 and 40.1600, can be discharged to the ground subsurface and/or groundwater only when following appropriate guidelines.

TABLE 9-1
J-2 Range Remedial Investigation/Feasibility Study
Summary of Regulatory Considerations*

AUTHORITY/TYPE	PROVISION	SYNOPSIS
State/Action Specific	Groundwater Discharge Regulations [314 CMR 5.00]	Recharge of effluent from some treatment works requires a permit under Groundwater Discharge Regulations at 314 CMR 5.00 unless the exemption allowing for actions taken in compliance with MGL C. 21E and regulations at 40 CMR 40.00 applies. The effluent discharged must not exceed any Massachusetts Groundwater Quality Standards and effluent limitations in 314 CMR 5.10(3). For previous projects on MMR, the MassDEP has determined that effluent from any constructed treatment system is “conditionally exempt” from obtaining the permit provided that the applicable or relevant provisions of the MCP 310 CMR 40.0000 are complied with.
State/Action Specific	MassDEP Drinking Water Program, Private Well Guidelines (2008), available at http://www.mass.gov/dep/water/laws/prwellgd.pdf	These are guidelines concerning private well location, design, construction, development, water quality testing, operation, maintenance, and decommissioning.
State/Action Specific	Underground Injection Control [310 CMR 27.00]	These regulations prohibit injection of fluid containing any pollutant into underground sources of drinking water where such pollutant will, or is likely to, cause a violation of any state drinking water standard or adversely affect the health of persons.
State/Action Specific	STATE - MA Erosion and Sediment Control Guidelines for Urban and Suburban Areas (May 2003), available at http://www.mass.gov/dep/water/essec1.pdf	Provides guidance and best management practices regarding erosion and sediment control.
Federal/Action Specific	Archaeological Resources Protection Act, 16 U.S.C. §§ 470aa-ll, 43 CFR Part 7; Native American Graves Protection and Repatriation Act, 25 U.S.C. §§ 3001-3013, 43 CFR Part 10, National Historic Preservation Act, 16 U.S.C. §§ 470 et seq., 36 CFR Part 800; Massachusetts Historic Preservation Act, MGL ch. 9 §§ 26-27C; MGL ch. 7, § 38A; MGL ch. 38, §§ 6B-6C; 950 CMR 70-71.	These statutes and regulations provide for the protection of historical, archaeological, and Native American burial sites, artifacts, and objects that might be lost as a result of a federal construction project.
State/Action Specific	Massachusetts Endangered Species Act.	The Massachusetts Endangered Species Act provides that impacts to state-listed endangered or threatened species, or species of special concern or their habitats from actions are to be avoided, minimized, and/or mitigated.

*Regulations that EPA will either consider or require, as appropriate, in selecting and defining the remedial action as specified in the final decision document.
